LE NOSTRE SOLUZIONI | OUR SOLUTIONS

BARTubeless®

si intende l'applicazione del solo sistema BARTubeless® sui cerchi del cliente. In alcuni modelli è necessario sostituire il cerchio originale: in questi casi offriamo in alternativa i nostri **pacchetti conversione** che includono la sostituzione del cerchio o i nostri **set di ruote complete**.

we mean the application of the BARTubeless® system only on the customer's rims. In some models it is necessary to replace the original rim: in these cases we offer alternatively our **conversion bundles** that include rim replacement or our **complete wheelsets**.

pacchetti conversione | conversion bundles

i pacchetti conversione BARTubeless® includono **BARTubeless® su entrambe le ruote** e la **sostituzione del cerchio** quando privo di bordo antistallonamento (solitamente quello anteriore); possono includere servizi aggiuntivi come la **sostituzione dei raggi**, la centratura e il bilanciamento a prezzi vantaggiosi.

our conversion bundles include the replacement of the standard rims without hump edge (usually the front one), **BARTubeless® on both wheels** and additional services designed for the most common needs of motorcyclists, such as **spoke replacement**, centering and balancing, at advantageous prices.

set ruote complete | complete wheelsets

set di ruote a raggi **complete** ad alte prestazioni per gli usi più estremi, **tubeless-ready** con sistema BARTubeless®, colori personalizzabili, **plug and play**, già assemblate e pronte all'uso.

pairs of high performance, complete spoked wheels for the most extreme uses, tubeless-ready with BARTubeless® system, customizable colors, plug and play, already assembled and ready to use.

BARTubeless è potenzialmente adatto ad ogni tipo di ruota a raggi. Tuttavia, diversi modelli di moto possono avere problematiche differenti che richiedono soluzioni specifiche. La tabella di seguito riassume le soluzioni da noi testate e offerte per ogni modello. Se la vostra moto non rientra tra quelle elencate, contattateci per maggiori informazioni.

BARTubeless® is suitable for almost any type of spoked wheels. However, different motorcycle models may require specific solutions. In the following table there is a list of models with the relative solutions we have already tested and which we currently offer. If your bike does not fall under those listed here, please contact us for more information.
